

WYVERN

“Some nasty flying lizards have come over the mountains from the southern swamplands. I hope they don’t come further down and attack the decent village folk travelling along the foothills.”

– LOTTIE TUPP’S DIARY FOUND ON A FOOTHILL ROAD

Wyverns are winged creatures who make their nests on cliffs or rock faces close to swamps or quagmires. They often hunt in small groups, swarming their victims, ramming and biting them, and ripping them apart. They are even known to carry smaller prey back to their nests still kicking and screaming.

Some scholars speculate that the wyvern is a distant and feral relative of the dragon hawks that fly around the city of Arkand. However, nobody has found any decisive evidence to support that theory.

When attacked by a flock of wyverns, it is best to try and force them to the ground where they cannot fly away or use their ram attack. Nets, lassoes, and hooks are useful tools to catch them and bring them down.

RANDOM ENCOUNTER

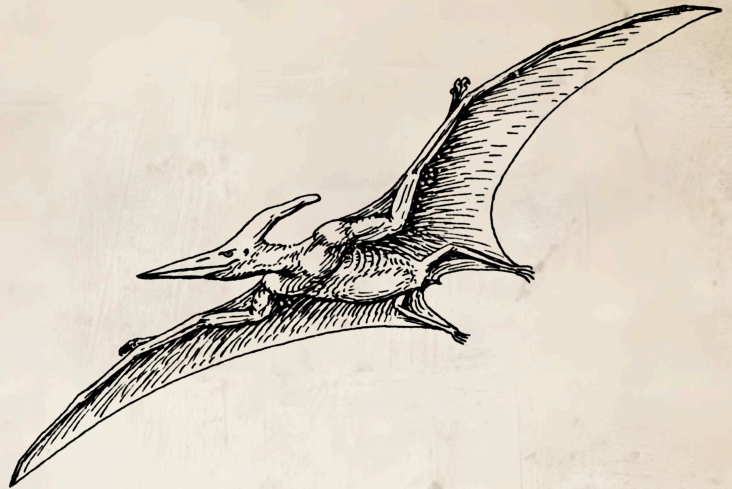

While journeying on a road next to an outstretched swamp, the adventurers hear screams and whinnying up ahead. A traveling merchant and his horse-drawn cart are being attacked by two wyverns the size of small ponies. The merchant is Gant Gunderson, a wine seller on his way home from a successful purchase of the finest elven wine. If rescued, he is overjoyed and invites the player characters to visit him in his shop in the closest larger town or city. He also offers payment of 2 gold per day for each of the player characters if they accompany and protect him on his ways there.

FEROCITY: 1 **SIZE:** Large

MOVEMENT: 24 **ARMOR:** 1 **HP:** 20

WINGS: The wyvern’s wings allow it to move freely through the air.

AIRBORNE: If a wyvern is forced to the ground, roll a D4 on its monster attacks and attacks against it get a boon.

MONSTER ATTACKS

D6 ATTACK

- 1 **WYVERN SCREECH!** The wyvern lets out an ear-shattering screech. Everyone within 10 meters becomes Scared. Those who are already Scared suffer a fear attack.
- 2 **CLAW ATTACK!** The wyvern sweeps its claws at two opponents within 2 meters of each other. The victims take 2D6 slashing damage each.
- 3 **BEAK BITE!** The beast opens its jaws and bites the nearest opponent. The attack inflicts 3D8 slashing damage and a victim who takes damage is also exposed to a disease with virulence 9.
- 4 **WING FLAP!** The wyvern flaps its wings to create a gust of wind. Any loose objects or creatures of up to human size within 10 meters are hurled D8 meters, take the same amount of bludgeoning damage, and land prone.
- 5 **RAM DIVE!** The wyvern dives down and ramms into an opponent. The victim is knocked back 2D4 meters, takes an equal amount of bludgeoning damage, and lands prone.
- 6 **LONG DROP!** The wyvern grabs a player character with its claws and takes to the sky. Unless the victim dodges the attack, the wyvern grabs them and flies 2D6+6 meters into the air. On its next turn the wyvern drops the victim (instead of making a new monster attack), who takes damage from the fall.
